CONTENTS OF VOLUME 6

PART 1 JULY 1959

Atomic recombination in a hypersonic wind-tunnel nozzle. By K. N. C. BRAY *page* 1

Energy dissipation in standing waves in rectangular basins. By GARBIS H. KEULEGAN 33

A three-dimensional solution for waves in the lee of mountains. By G. D. CRAPPER 51

The magnetohydrodynamic flow past a flat plate. By H. P. GREENSPAN and G. F. CARRIER 77

Development and use of a vane device for boundary-layer measurements. By J. G. BURNS, W. H. J. CHILDS, A. A. NICOL and M. A. S. ROSS 97

The rise of a gas bubble in a viscous liquid. By D. W. MOORE 113

On the instability theory of the melted surface of an ablating body when entering the atmosphere. By SAUL FELDMAN 131

REVIEWS

Proceedings of the Symposium on Naval Hydrodynamics 156

Festschrift Jakob Ackeret 159

PART 2 AUGUST 1959

Shearing flow over a wavy boundary. By T. BROOKE BENJAMIN 161

Torsional oscillations of a plane in a viscous fluid. By S. ROSENBLAT 206

Measurements of intermittency of turbulent motion in a boundary layer. By V. A. SANDBORN 221

An analysis of the vortex street generated in a viscous fluid. By JOHN W. SCHAEFER and SALAMON ESKINAZI 241

The analysis of temperature fluctuations by pulse-counting techniques. By A. A. TOWNSEND 261

Reverse flow and supersonic interference. By JOSEPH H. CLARKE 272

The theory of electromagnetically driven shock waves. By J. K. WRIGHT and M. C. BLACK 289

The pressure distribution on dihedral wings at supersonic speed. By LU TING 302

REVIEWS

Fluid Mechanics for Engineers page 313

A Textbook of Fluid Mechanics 316

Fluid Mechanics 318

PART 3 OCTOBER 1959

A theory of dispersion in a porous medium. By P. G. SAFFMAN 321

The motion of bubbles in a vertical temperature gradient. By N. O. YOUNG, J. S. GOLDSTEIN and M. J. BLOCK 350

Two-dimensional convection from heated wires at low Reynolds numbers. By D. C. COLLIS and M. J. WILLIAMS 357

Heat transfer in slip flow at low Reynolds number. By H. C. LEVEY 385

Interactions of detonation waves. By E. LARISCH 392

Horizontal diffusion in the atmosphere as determined by geostrophic trajectories. By C. S. DURST, A. F. CROSSLEY and N. E. DAVIS 401

Turbulent entrainment in stratified flows. By T. H. ELLISON and J. S. TURNER 423

Electron density and ionization rate in thermally ionized gases produced by medium strength shock waves. By Y. MANHEIMER-TIMNAT and W. LOW 449

The stability of viscous flow between rotating concentric cylinders with a pressure gradient acting round the cylinders. By R. C. DIPRIMA 462

An experimental investigation of the stability of plane shock waves. By K. C. LAPWORTH 469

PART 4 NOVEMBER 1959

Non-equilibrium flow over a wavy wall. By WALTER G. VINCENTI 481

Pressure and velocity measurements on detonation waves in hydrogen-oxygen mixtures. By D. H. EDWARDS, G. T. WILLIAMS and J. C. BREEZE 497

On the stability of a shear layer. By J. MENKES 518

Continuum equations in the dynamics of rarefied gases. By MAX KROOK 523

Pressure drop due to viscous flow through cylinders. By HOWARD BRENNER 542

Experiments on the flow past a circular cylinder at low Reynolds numbers. By D. J. TRITTON 547

On the generation of surface waves by shear flows. Part 2. By JOHN W. MILES *page* 568

On the generation of surface waves by shear flows. Part 3. Kelvin–Helmholtz instability. By JOHN W. MILES 583

The symmetric state of a rotating fluid differentially heated in the horizontal. By ALLAN R. ROBINSON 599

REVIEWS

Introduction to the Theory of Compressible Flow 621

INDEX TO VOLUME 6 623
